MMT / USLW: physical-mesh hard-PDF vs prior eta-learning, ten-seed mean curves

Seeds 101-110 on both sides; colored lines: 10-seed mean of the per-lambda ensemble metric (band: min-max).

η-learning $\lambda = 0$: 10-seed mean

η-learning $\lambda = 10^{-9}$: 10-seed mean

η-learning $\lambda = 10^{-6}$: 10-seed mean

η-learning $\lambda = 10^{-3}$: 10-seed mean

η-learning $\lambda = 1$: 10-seed mean

New hard-PDF (physical mesh): ensemble, 10 seeds

New hard-PDF (physical mesh): member-average, 10 seeds

Black/grey: new hard-PDF ensemble / member-average metric (band: 10-seed range). Continuous-law PDF metric shown separately.
